

HOW ESC-SHOOTING.ORG USES COOKIES

A cookie is a small piece of text sent to your browser by a website you visit. It helps the site remember information about your visit, which can make it easier to visit the site again and make the site more useful to you.

For example, we use cookies to remember your preferred language, to make the ads you see more relevant to you, to count how many visitors we receive to a page, to help you sign up for our services, to protect your data, and to remember your ad settings.

This page describes the types of cookies used by esc-shooting.org.

TYPES OF COOKIES USED BY ESC-SHOOTING.ORG

Some or all of the cookies described below may be stored in your browser. You can also manage cookies in your browser (though browsers for mobile devices may not offer this visibility).

Functionality

Cookies used for functionality allow users to interact with a service or site to access features that are fundamental to that service. Things considered fundamental to the service include preferences like the user's choice of language, product optimizations that help maintain and improve a service, and maintaining information relating to a user's session, such as the content of a shopping cart.

Security

Cookies used for security authenticate users, prevent fraud, and protect users as they interact with a service.

Some cookies are used to prevent spam, fraud, and abuse. For example, the 'pm_sess' and 'YSC' cookies ensure that requests within a browsing session are made by the user and not by other sites. Both cookies prevent malicious sites acting without a user's knowledge and as if they were that user.

Analytics

Cookies used for analytics help collect data that allows services to understand how users interact with a particular service. These insights allow services both to improve content and to build better features that improve the user's experience.

If you have personalized ads enabled, 'ANID' is used to remember this setting and lasts for 13 months in the European Economic Area (EEA), Switzerland, and the United Kingdom (UK), and 24 months everywhere else. If you have disabled personalized ads, 'ANID' is used to store that setting until 2030. 'NID' expires 6 months from a user's last use. 'IDE' lasts for 13 months in the EEA, Switzerland, and the UK and 24 months everywhere else.

Personalization

Cookies used for personalization enhance the user's experience by providing personalized content and features.

MANAGING COOKIES IN YOUR BROWSER

Most browsers allow you to manage how cookies are set and used as you're browsing, and to clear cookies and browsing data. Also, your browser may have settings allowing you to manage cookies on a site-by-site basis.
