RE: INTERNET COVERAGE OF THE 2018 EUROPEAN CHAMPIONSHIP 10M
IN GYÖR

Dear Colleagues and Friends,

Two weeks are left till the beginning of the 2018 European Championship 10m in the city of Győr, Hungary. As we have informed you before there will be live TV broadcasting of the Finals in six Olympic events: Air Rifle Men, Air Rifle Women and Air Pistol Mixed Team on February 23rd as well as Air Pistol Men, Air Pistol Women and Air Rifle Mixed Team on February 24th.

Besides, there will be live Internet streaming that will cover the Finals in all individual, Mixed Team and Team events in Air Rifle/Air Pistol as well as the Running Target competitions in Junior and Senior categories on February 20th-25th. It will also cover the continental qualification for the 2018 Youth Olympic Games on February 18th.

It means, all necessary technical arrangements have been done by the Organizing Committee, the Hungarian Shooting Federation and the European Shooting Confederation that allow the shooting community to make a choice how to follow the 2018 European Championship 10m: on TV or through Internet.

The livestream player will be placed on the websites of the Hungarian Shooting Federation and the European Shooting Confederation. In order to get access to the signal any viewer will have to take part in the new experiment of the European Shooting Confederation and show his/her real interest in the competitions by paying 3 Euro for one day of streaming or 15 Euro for streaming during the whole Championship, from February 18th till February 25th.

Once the main decision is taken the viewer will have to choose one of the two price options given by the player, then register using email, select the payment method (credit card or PayPal) and make the payment. As soon as the payment is done the access will be granted. If the viewer leaves the page, he/she should login as existing user for the next visits to get the access to the livestream that had been paid for.

Those Member Federations that would like to stream the competitions on their own websites have to contact the ESC Secretariat in order to obtain the respective rights. Then we will provide with the iframe code of the player that can be embedded into the respective website. As soon as the streaming starts, the player will show the events.

The video records of all the Finals will be loaded on the ESC website for open viewing the next day after the live streaming.

The Member Federations are requested to promote the 2018 European Championship 10m and inform the shooting community about the possibility to follow live from Győr the competitions of the best athletes.

Please, do not hesitate to contact the ESC Secretariat if any additional information is needed.

Sincerely,

Alexander Ratner
Secretary General
